# LC 11()- Corps purs et mélanges binaires (PSI)

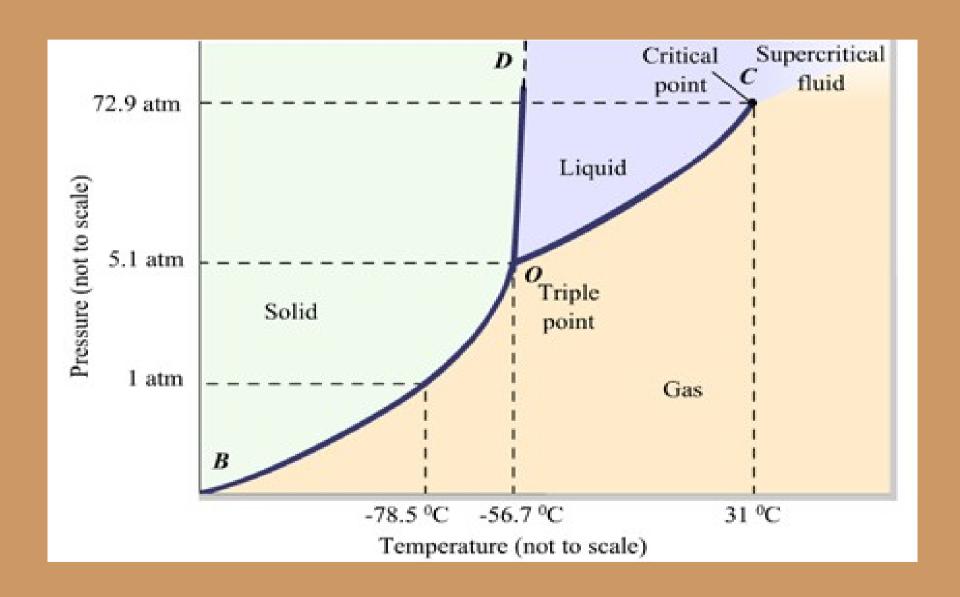

#### Pré-requis:

- Principes de la thermodynamique
- Potentiel Thermodynamique
- Enthalpie libre

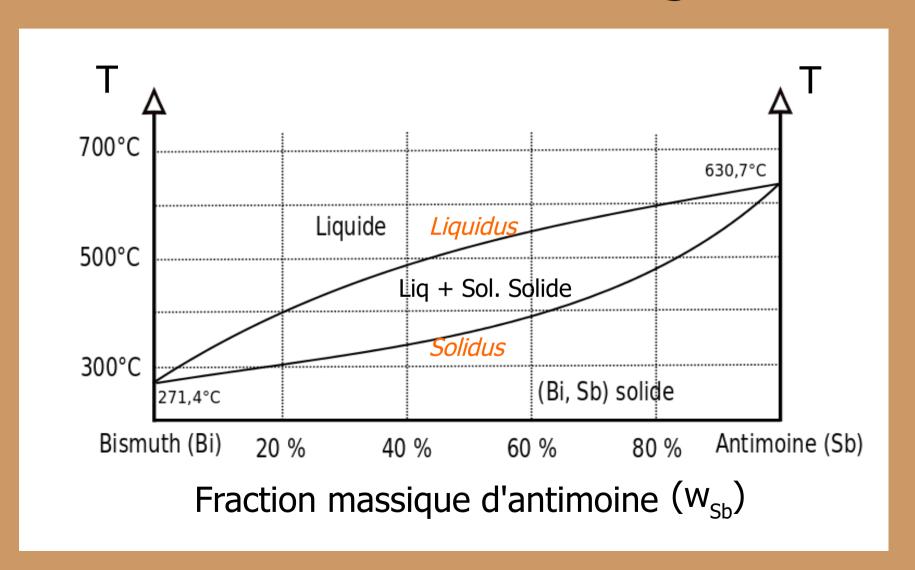

#### Diagramme de phase de l'eau (P,T)

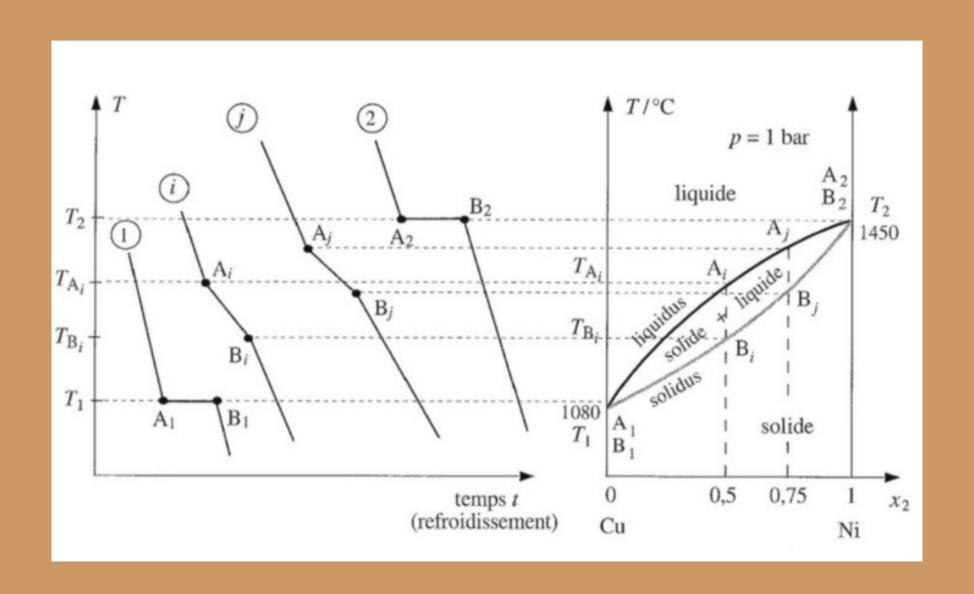

#### Diagramme de phase du CO<sub>2</sub> (P,T)

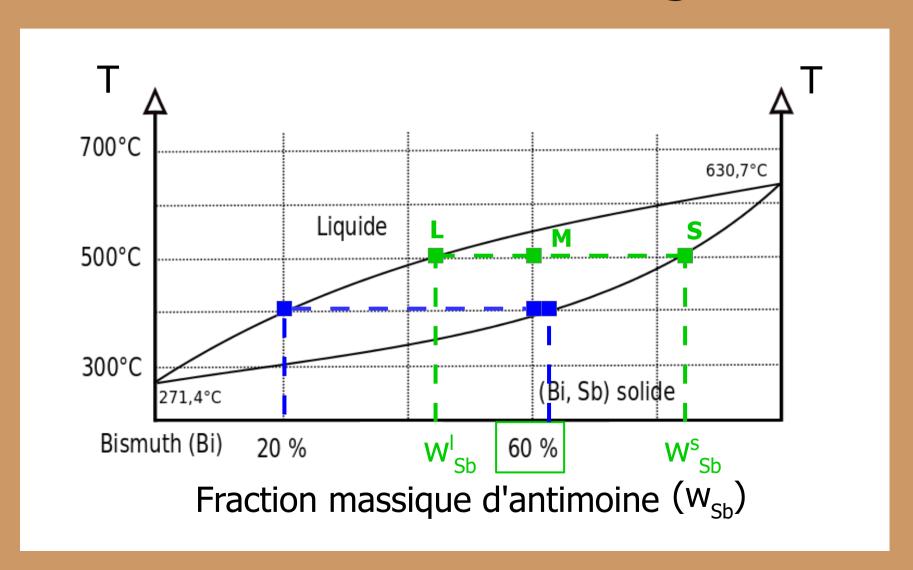

#### Diagramme binaire Bi-Sb: miscibilité totale, mélange idéal

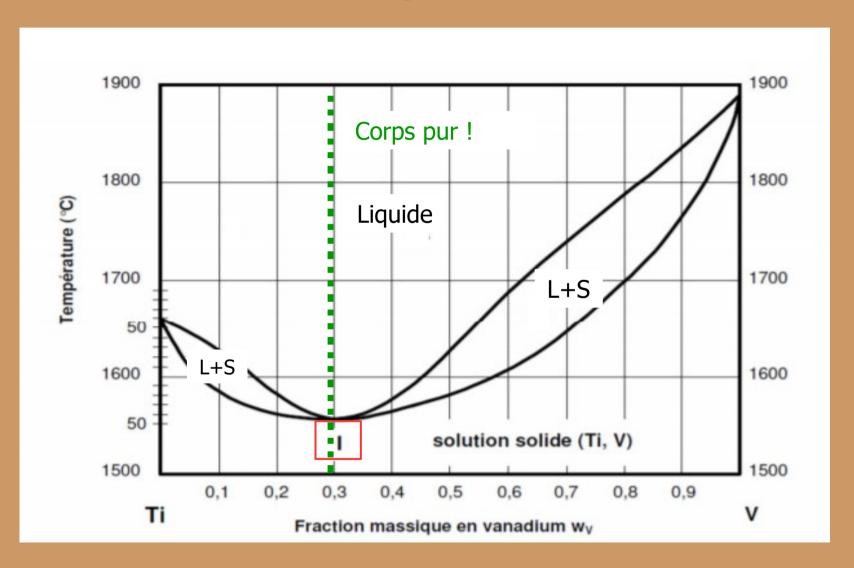

#### Construction diagramme Cu-Ni

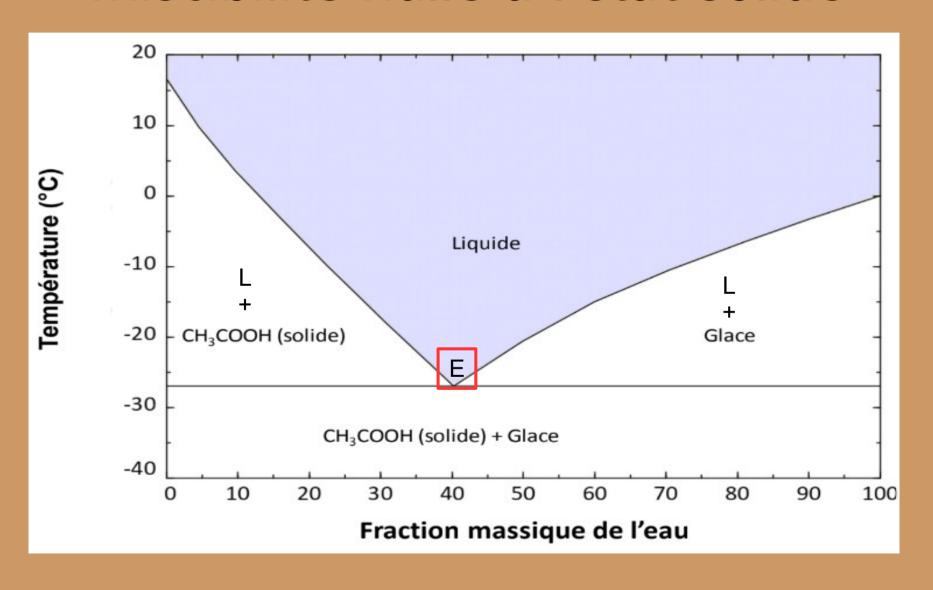

#### Diagramme binaire Bi-Sb: miscibilité totale, mélange idéal

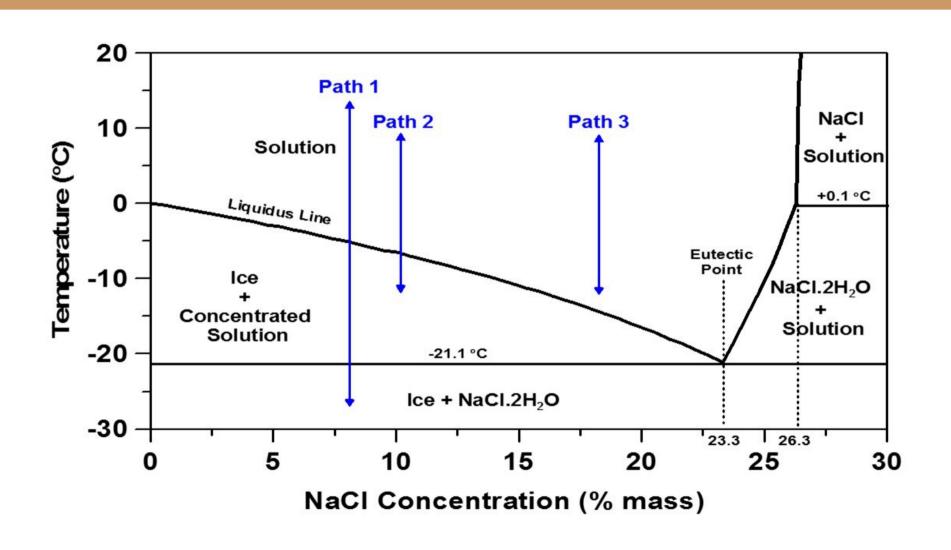

## Diagramme binaire Ti-V : mélange non idéal

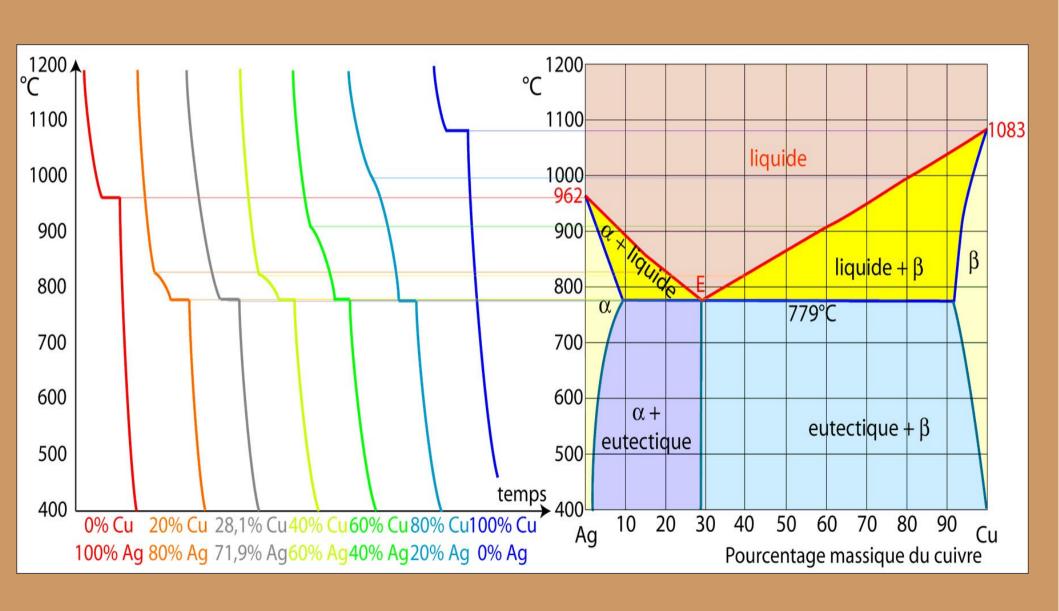

## Diagramme binaire H<sub>2</sub>O-CH<sub>3</sub>COOH: miscibilité nulle à l'état solide

## Diagramme binaire Eau-salée : miscibilité nulle à l'état solide

#### Diagramme binaire Ag-Cu : miscibilité partielle à l'état solide

### Réactivité en phase solide : Composé défini
