# LP 45 Paramagnétisme, ferromagnétisme : approximation du champ moyen

Naïmo Davier

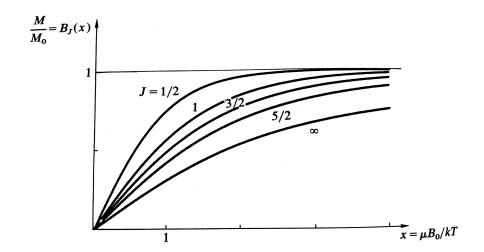

Université Paul sabatier

April 10, 2019

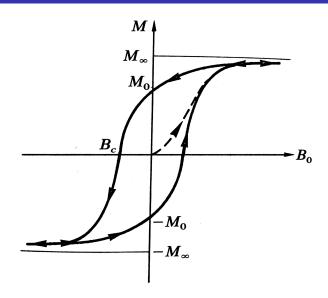

## Paramagnétisme, aimantation spin 1/2

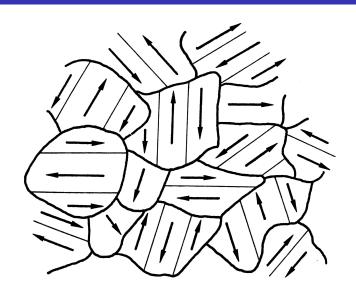

## Paramagnétisme, aimantation cas général $J \neq 1/2$

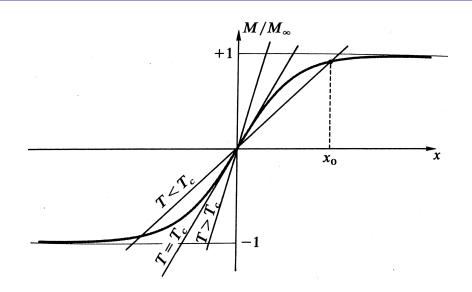

### Ferromagnétisme, cycle d'hystérésis

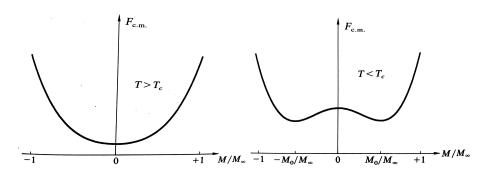

## Ferromagnétisme : domaines de Weiss

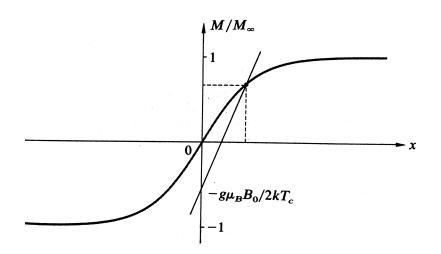

## Solution en champ nul

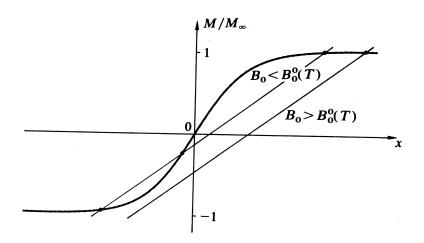

## Énergie libre

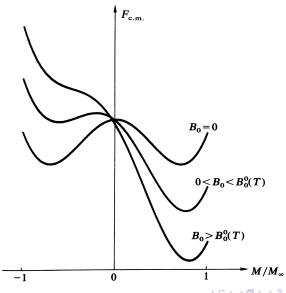

## Solution générale : $T > T_c$

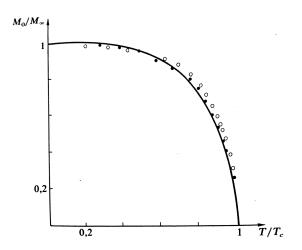

## Solution générale : $T < T_c$

#### Solution générale : énergie libre

## Comparaison avec les résultats expérimentaux

Points noirs pour le cobalt et nickel, et blancs pour le fer.
